

Marriage Lines

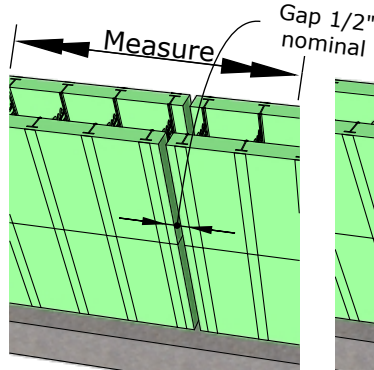

Use retractable blade knife to cut EPS

Note:
Where a 'marriage line' occurs on a web move the cut 2 inches away.
Also:
Where creating a 'marriage line' at a corner, choose the long end of corner with webs for strapping

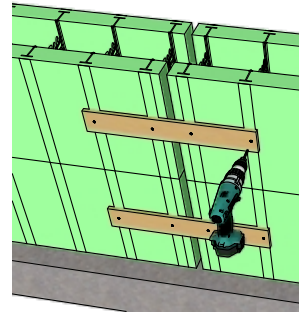

Dimension Adjust

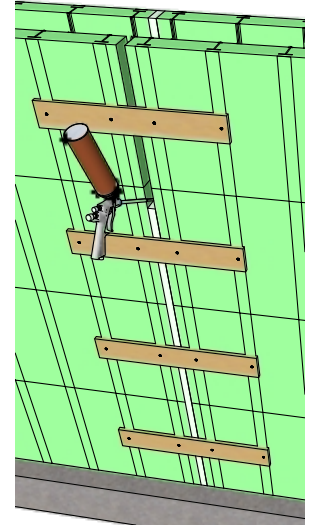

Create a 'Marriage Line' to achieve a set dimension.
Typically one per wall, if possible within an opening area.

Check overall dimensions (allow 2 5/8" each side additional to concrete dimensions)

Use 1x4 strapping to fix each side in place

Fill join completely with foam using Applicator
